The previously used Solartainer Amali can be transported to the next village that is not yet electrified and can be used there again at any time. This unique selling point saves production ...

In the heart of Nairobi, what begins as a rusting steel box on a Monday morning can, by Thursday evening, become a solar-powered home complete with water, electricity, and ...

In the East African Community, the project focuses on demonstrating and replicating solar-powered electric mobility solutions for motorcycle taxis (boda-bodas) in ...

Turns out these solar-powered container units might actually deliver it. They're sort of like Lego blocks for clean energy--stackable, movable, and surprisingly efficient.

A shipping container solar system is a modular, portable power station built inside a standard steel container. A Higher Wire system includes solar panels, a lithium iron phosphate ...

Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

An off-grid power system that delivers power to converted container buildings and container-based renewable energy systems designed to supply power to other buildings.

This revolution is shaped in steel and forged from creativity: shipping container homes. Once used for transporting cargo across oceans, these ...

This revolution is shaped in steel and forged from creativity: shipping container homes. Once used for transporting cargo across oceans, these metal giants are being reborn as sleek, modern, ...

An off-grid power system that delivers power to converted container buildings and container-based renewable energy systems designed to supply ...
