Solar continues to dominate new electricity generation capacity added to the grid in the United States, according to the Energy Information Administration's (EIA) latest release ...

About this data Total solar capacity Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes ...

Solar accounted for 69% of all new electricity-generating capacity added to the US grid in Q1 2025. The US added 8.6 GW of solar module manufacturing capacity in Q1, bringing ...

About this data Total solar capacity Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes solar photovoltaic and concentrated solar power.

New York State has achieved a significant milestone in its renewable energy journey by installing over 6 gigawatts (GW) of distributed solar capacity, surpassing its initial ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

New York has achieved a significant milestone in its journey towards sustainable energy with the surpassing of 6 GW of distributed solar capacity. This accomplishment comes ...

Renewable hydropower capacity increased by 15.0 GW (+1.2%), bioenergy by 4.6 GW (+3.2%), and geothermal energy by 0.4 GW (+2.5%). Solar and wind energy continued to dominate ...

The United States installed a record-breaking 50 GW of new solar capacity in 2024, the largest single year of new capacity added to the grid by any energy technology in ...

The U.S. solar manufacturing sector is witnessing remarkable growth, with cumulative capacity reaching 8.6 GW in 2025, as reported by the Solar Energy Manufacturing ...

6 GW of solar capacity
