---

Since 2023, a number of 300-megawatts-grade compressed air energy storage projects along with 100-megawatts-grade liquid flow battery projects begun construction.

Discover how Jakarta is leading Southeast Asia's transition to renewable energy through cutting-edge compressed air storage solutions.

Jakarta's tropical climate demands robust Battery Management Systems (BMS). Local startups like Batavia Power are developing humidity-resistant modules that extend battery life by 40% ...

From peak load management to carbon footprint reduction, Jakarta's factories demonstrate how intelligent energy storage drives operational resilience. As technology advances and costs ...

DHL has a broad network of waste battery storage sites and dedicated carriers for the transport, repair, reuse, remanufacture, and recycling of these dangerous goods.

Whether you're an industry professional, a tech enthusiast, or simply curious about the future of energy storage, this exhibition offers something for everyone. Battery & Energy Storage ...

JAKARTA, March 18 (Xinhua) -- Indonesia's state-owned electricity company PT PLN and its subsidiaries have collaborated with the Indonesia Battery Corporation (IBC) to build a battery ...

Jakarta's energy storage sector isn't just growing--it's exploding faster than a lithium-ion battery in a heatwave (don't worry, modern systems have safety protocols for that).

The general focus on transportation and warehousing solution design is concentrated on green and amber areas, due to the specialised nature of red (critical) damaged batteries

Indonesia's state-owned utility and battery producer have launched a 5MW battery energy storage system (BESS) pilot project as it seeks to move away from diesel-generated power.
