What is an uninterruptible power supply (UPS)?

However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in. Its main function is to act as a big battery that powers your devices when your electricity goes out.

Is an uninterruptible power supply worth the investment?

But if you want to keep your home Wi-Fi network and some other key electronics up and running in the event of an outage, an uninterruptible power supply, or UPS, is worth the investment.

How do I choose an uninterruptible power supply?

To select the right uninterruptible power supply (UPS), calculate the average power required for all connected appliances. For instance, a 350-500 VA capacity is suitable for an LCD monitor or a regular PC.
