With its ability to block 60% of solar energy while allowing 70% of visible light to pass through, Solarban® 60 glass can help you provide year-round comfort with heating and cooling cost ...

With its ability to block 60% of solar energy while allowing 70% of visible light to pass through, Solarban® 60 glass can help you provide year-round ...

For this reason, insulating laminated glass is utilized for skylights or other overhead glazing applications. Often the laminated inboard component is required to provide protection against ...

Saflex Solar PVB interlayers offer superior solar control, reducing heat gain and UV radiation while maintaining high visible light transmittance for laminated glass.

The Solarvolt (TM) glass system by Vitro Architectural Glass is ideal for performing the functions of classic glass facades, vision glazing and spandrel glass. In these applications, the glass ...

Laminated glass with S-LEC(TM) Solar Control Film guarantees clear views and allows for excellent light transmittance with blocking IR. Whether you need to work, teach, cook, or craft, there is ...

From functional installations to striking architectural features, Archetype delivers precision, quality, and custom design options you won't find anywhere else.

Saflex Solar is a solar absorbing PVB interlayer that brings improved solar control by reducing solar heat gain versus clear and conventional laminated glass without coatings.

We offer water resistant laminated glass construction incorporating rice paper, fabric and color in glass for high moisture environments including frameless shower glass enclosures and tubs.

Take a look at how solar control glass and laminated glass - either individually or combined - help to maintain a comfortable home, with views and natural light and reduce the risk of ...
