Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small, private HPPs (under 30 MW), mostly constructed since 2007. Installed capacity is ...

When Armenia's second-largest city Gyumri greenlit its landmark photovoltaic energy storage project last month, it didn't just approve another solar installation.

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar ...

This output marks a meaningful addition to Armenia's energy landscape, reducing dependence on non-renewable sources while meeting the community's everyday needs for power reliability ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small, private HPPs (under 30 MW), mostly ...

From now on, every solar power system installed by Solaron will contribute to the reforestation of Armenia. For each installed solar station, our customers will have five newly planted trees in ...

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is ...

Armenia's geography provides an ideal setting for solar power generation, with over 2,500 hours of sunshine annually. Recognizing this potential, the government introduced ...

Building on this success, the Armenian government has announced plans to launch the construction of two more solar power stations in the Vayots Dzor and Syunik ...
