The purpose of this report is to consolidate the key learnings arising from the development, connection and operation of four ARENA-funded grid-forming (GFM) battery energy storage ...

The Victorian government said the grid-forming technology will help the state achieve its energy storage targets and support the transition to renewable energy by providing ...

Australia's energy regulator investigated how grid-forming inverter technology could replace traditional synchronous condensers.

This guidance report has been commissioned by the Australian Energy Council to initiate and facilitate collaboration amongst its member organisations towards a harmonised leading ...

In this paper, the literature and public available information on operational battery storage systems in Australia are reviewed and discussed. It is found that both small batteries and large ...

This fact sheet contains information relevant to parties seeking to connect battery energy storage systems (BESS) with grid-forming inverter capabilities within the National Electricity Market ...

Energy Networks Australia has launched the first of a set of guidelines for safe, consistent and efficient connection of solar, storage and battery devices to the grid. The guidelines are the ...

An overview of network measures and standards to control inverter-based consumer energy resources in Australia

German based inverter and battery storage specialist SMA is claiming two firsts for Australia's electricity market, after sealing grid connection approval for what it says will be ...

The Australian Energy Market Operator (AEMO) has released a determination to help simplify the technical
