What is a 20ft shipping container?

In logistics, storage, and construction, the 20ft shipping container is a versatile and essential asset. Whether you're transporting goods, creating storage spaces, or embarking on a construction project, understanding the intricacies of a 20ft container is crucial.

What are modular bridge kits?

Modular bridge kits from Roadrunner Bridge -- prefab steel spans built strong and delivered ready to install. Reduce costs and downtime; request a quote.

What are the different types of 20ft containers?

20ft containers come in different types to cater to various needs: Standard Containers: Ideal for general cargo and storage. High Cube Containers: Offer extra height for increased CBM. Refrigerated Containers (Reefers): Equipped with cooling systems for perishable goods. Open-Top Containers: Suitable for oversized or irregularly shaped cargo.

Should I buy a new or used 20ft container?

The decision between new and used 20ft containers depends on your specific needs, budget, and intended use. For long-term projects or where pristine conditions are essential, a new container may be the best choice. However, for cost-effective solutions and immediate availability, a used container can be an excellent option.

We'll take a look at if it's possible to repurpose a shipping container into a functional bridge and some of the pros and cons of doing so.
