A critical component of the Blueprint is understanding where the industry has been successful in efforts across the country to advocate for enforcement of the National Fire ...

15 draft recommendations have been proposed by the working group after completing an examination of the existing FCNYS and other energy storage fire safety ...

Lithium-ion (Li-ion) battery technology is commonly used for stationary grid scale BESS and poses inherent fire safety hazards due to li-ion battery failure.

Following a series of fires at three battery energy storage system (BESS) locations across New York State in 2023, Governor Hochul convened an interagency Fire Safety Working Group ...

This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS ...

This webpage includes information from first responder and industry guidance as well as background information on battery energy ...

Battery Energy Storage Systems (BESS) have become a cornerstone of the clean energy transition, stabilizing power grids and storing electricity from renewable sources. But as ...

Through Siemens research with multiple lithium-ion battery manufacturers, the FDA unit has proven to detect a pending battery fire event up to 5 times faster than competitive detection ...

In this review, we comprehensively summarize recent advances in lithium iron phosphate (LFP) battery fire behavior and safety protection to solve the critical issues and ...

The report is a culmination of a two-year research project examining the characteristics of fires resulting from the overheating of lithium-ion battery energy storage ...
