What are custom made battery cables?

Custom made battery cables feature pure copper conductors with copper connectors such as ring terminal cable lugs and top post style battery terminals. We offer many sizes and configurations of battery cables which you can custom design here on the site. The battery cables are organized by wire gauge size below.

Can I custom design a battery cable?

We offer many sizes and configurations of battery cables which you can custom design here on the site. The battery cables are organized by wire gauge size below. If you don't see a cable style you need please email or call us and we'd be glad to help design the cable for you.

Can I create a battery cable with Kalas?

With Kalas, the possibilities for creating your battery cable are endless. Click on the product images & links below to learn about some of our capabilities. Our teams are committed to on-going training & education to assure you receive the most current research & technology implemented into your products & how they are produced.

What are Kalas maintenance-free cable assemblies?

Kalas maintenance-free cable assemblies provide extra protection against harsh environments. Terminals are crimped to the cable, then encapsulated in PVC. When installed, this design forms a weatherproof seal to maintain the superior electrical characteristics of the terminal.

Sino-Conn offers custom battery cable assemblies with no MOQ, fast delivery, 100% quality inspection, and free design. OEM & end-user solutions available.

Wiringo builds custom battery cable assemblies in various lengths and configurations, all with short lead times. We always begin our client projects with an extensive requirements analysis ...

Experts in creating custom battery cables including power harness assemblies, simple lug (ring), remote jump-start & die cast terminals, & maintenance-free

As a full service battery cable assembly contract manufacturer, Arimon can assist with design and engineering, prototypes and samples and supply ...
