Is a 100W solar power station a good choice?

A new compact power station by an upcoming brand with bigtime battery experience. Our favorite aspect is the fast AC charging combined with >20ms UPS transfer time. The 100W solar charging matches the top brands. Although testing is limited and brand recognition still has a long way to come, this may be a real contender.

Should you buy a portable power station?

We find this level of portable power station to be a little awkward, basically the teenager version of the device. The 3-year warranty is less than ideal, especially from a newer company.

Can a portable solar generator store a lot of power?
