Bhutan's unique geography presents both opportunities and challenges for solar energy deployment, particularly in off-grid rural electrification and backup energy for remote villages.

Developed by the Bhutan Energy Research and Development Center (BERDC) with support from the International Solar Alliance (ISA), the roadmap focuses on deploying ...

It is based on the analysis of a pilot project covering 361 households in rural areas of Bhutan. A mix of qualitative and quantitative methods is applied, which captures the multi ...

Therefore, this research aimed to study the potential of solar energy, and to do an economic evaluation of stand-alone PV systems, for remote of-grid areas of Bhutan.

The Department of Energy, MoENR announces the commissioning of Phase I (17.38 MWp) of the Sephu Solar Project in ...

These sessions cover critical topics such as solar grid-interconnection codes, energy efficiency, and seasonal storage to accelerate Bhutan's clean energy progress.

A solar photovoltaic (PV) power plant will be constructed and will add 22 to 23 megawatts of clean energy to Bhutan's power grid. The solar PV power plant will complement hydropower in forming a more diversified electricity generation system and create resilience to the ...

We are seeking funding for the installation of a decentralized solar PV system with a capacity exceeding 650 kW. By contributing to this project, you can ...

We are seeking funding for the installation of a decentralized solar PV system with a capacity exceeding 650 kW. By contributing to this project, you can help bring clean and sustainable ...
