Who is Black Mountain Energy Storage?

Leveraging cumulative decades of electric market experience, Black Mountain Energy Storage develops powerful, flexible, and strategically placed battery energy storage projects to foster a resilient electric grid. BMES' quickly expanding team of energy experts are fast actors in pipeline development of utility-scale energy storage solutions.

Can Black Mountain Energy Storage build a battery energy storage facility?

Black Mountain Energy Storage is currently seeking to lease or purchase land to build battery energy storage facilities. A property needs to be at least 5-10 acres and located near or adjacent to existing electric transmission infrastructure in order to comfortably accommodate a battery energy storage facility.

Did UBS acquire Black Mountain Energy Storage?

UBS Asset Management today announced the acquisition of five standalone, development-stage energy storage projects in Texas from Black Mountain Energy Storage. Read more... Cypress Creek Renewables has added 400MW/600MWh to its storage portfolio after acquiring four Texas standalone energy storage projects from Black Mountain Energy Storage.

Black Mountain Energy Storage aims to develop utility scale energy storage solutions uniquely positioned to provide key grid reliability services required to support the integration of...

Black Mountain Energy Storage aims to develop utility scale energy storage solutions uniquely positioned to provide key grid reliability services ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

We were founded in 2021 to bring reliable energy storage capacity to the electric grid that will enhance system reliability and enable greater reliance on renewable generation.

Equinor-owned energy storage developer East Point Energy has acquired a 1 00MW/200MWh battery energy storage system (BESS) from Black ...
