Ever wondered how a city keeps the lights on when the sun isn't shining? Enter Bloemfontein's 2025 energy storage tender--a game-changer for South Africa's renewable ...

Concentrating solar power (CSP), when integrated with thermal energy storage (TES), can address both intermittency and storage needs by providing dispatchable renewable ...

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf]

From AI optimization to blockchain-powered energy trading trials (yep, that's a thing now), the Bloemfontein energy storage kWh tender is where old-school infrastructure ...

The Bloemfontein energy storage tender isn't just about batteries - it's about building a resilient grid architecture. With proper planning and local partnerships, this project could become ...

Traditional solar plants face the 'sunset problem' - energy production plummets when needed most. The Bloemfontein facility uses lithium-ion batteries with thermal management and AI ...

A 99.9MW energy storage project in development in northern England by Renewable Energy Systems (RES) has secured planning permission, with the asset set to be operational in late ...

How will pumped hydro energy storage power our future? Like the hydroelectric power stations that have powered Tasmania for a century, a new generation of pumped hydro plants will play ...

Power transmission from the solar power station South Africa's state-owned utility Eskom will purchase the entire power from the project under a 20-year power-purchase agreement.

South Africa's first public battery storage tender has awarded preferred bidder status to a consortium of CIP-owned Mulilo and renewables major EDF for three battery ...
