Where is Hungary's largest battery energy storage system located?

Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in Székesfehérvár, located close to Budapest. The new facility boasts a total power output of 40 MW and a storage capacity of 80 MWh.

Will Hungary's new battery energy storage system help green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backups as it charts its green energy path. In neighbouring Bulgaria, a massive 124MW/496MWh battery energy storage system went live in Lovech earlier this year.

How much money will the battery energy storage project receive?

The battery energy storage project will receive a HUF 2.7bn grant from the European Union's Recovery and Resilience Facility (RRF) and HUF 5.6bn in investment incentive funds from the Ministry of Foreign Affairs and Trade. Peter Archibald Schubert, managing director of Mol Exploration and Production Hungary said.

With the latest system coming online on 19 June, MET Group and Dunamenti Power Station are stepping up their support for Hungary's shift to cleaner energy. Europe sees ...

Hungary has taken a significant step forward in its energy transition with the inauguration of its largest standalone battery energy storage system (BESS).

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's ...
