Unlock the potential of battery energy storage systems for quality solar systems in Canberra, enabling energy independence and cost savings.

The Big Canberra Battery project will provide renewable energy security across the electricity grid. It will help grow the ACT's renewable energy sector, provide more local ...

ITP Renewables was engaged by Eku Energy to provide expert planning support throughout the development and delivery phases of the 250 MW ...

ITP Renewables was engaged by Eku Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will ...

This 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) is part of the Big Canberra Battery project and can store enough renewable ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to ...

Eku Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.

Additional 5000 batteries have been installed through the ACT Government's Next Generation Energy Storage Program. As of March 2025, there are over 10,600 Zero Emission Vehicles ...

The plant will have a solar photovoltaic capacity of 125 MW and a battery-based power storage system of up to 55MW/220 MWh. The company acquired the project from Sun ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid ...
