If China's "spare" solar capacity were put to use, they argued, it would enable the world to meet the goal -- agreed at the COP28 ...

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...

Market conditions reveal an increasing need for maintenance services across various projects, with a focus on energy management ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to ...

In CY2024, China hit a new record of annual net new capacity added to the grid at 429GW, a 21% y-o-y increase. Of this, wind and solar power combined capacity accounted for 83% at ...

Market conditions reveal an increasing need for maintenance services across various projects, with a focus on energy management systems that rely heavily on intelligent ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...

If China's "spare" solar capacity were put to use, they argued, it would enable the world to meet the goal -- agreed at the COP28 summit -- of tripling renewable generation ...

In Q1 2025, China's wind and solar capacity surpassed its thermal (coal and gas) capacity for the first time, supplying nearly 23% of the country's total electricity consumed, up from roughly ...

Wind and solar power are central to China's carbon neutrality strategy and energy system transformation.
