What is a switchboard upgrade?

A switchboard upgrade is an upgrade from the existing ceramic re-wire fuses or any older protection devices to a flush-mount board including new circuit breakers, RCD protection and a clean Earth up to current AS/NZS 3000:2000 Standards.

How do I upgrade a ceramic re-wire fuses?

Upgrading from the old ceramic re-wire fuses or older protection devices involves replacing the old bulky board with a sleek recessed switchboard with new circuit breakers, residual current device (RCD) protection, and cabling by current AS/NZS 3000 Standards. Each Switchboard comes with its own specifications and documents, for example as follows:

What is a main switch & circuit breaker?

Main Switch/Circuit Breaker: Individual Circuit Breakers (MCBs): Main RCD: 2-pole, 30mA sensitivity, covering all final subcircuits (lighting and power) in the switchboard. Residential and commercial switchboard upgrade and replacement, house rewiring, electrician services, free quote Auckland-wide.

Does a switchboard cost a repair or repair?

Any diagnostic work or repairs to existing wiring will be charged as an additional cost. Switchboards comply with AS/NZS standards and are made from fire-resistant material. This switchboard is applicable to a range of our circuit breakers including RCD bars, earth bars, neutral bars, and busbars.

Learn how to choose, replace, and upgrade your circuit breaker safely. Understand warning signs, safety tips, and when to call a licensed electrician for help.
