Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The Croatian Ministry of Environmental Protection and Green Transition has initiated a procedure to determine the need for an environmental impact assessment for the planned ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the ...

The battery system will have a discharge capacity of 38 MW and a storage capacity of up to 70.8 MWh, designed to operate for around twenty years. An environmental ...

The forthcoming battery storage facilities are intended to provide a buffer for electricity generated from renewable sources, allowing ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time ...

The forthcoming battery storage facilities are intended to provide a buffer for electricity generated from renewable sources, allowing for more flexible energy management ...

Croatia plans to install 600 MW of storage capacity by 2030 - enough to power 400,000 homes for a full day. The current project represents 26% of this national target.
