Solarvance is ready to support Czech partners and customers with efficient, EU-compliant solar solutions, including hybrid and storage systems, tailored for Central European conditions and ...

Get the latest Czech energy news. The government is revamping its solar energy strategy with new subsidies and streamlined laws to boost renewables. Learn more.

An amendment to Czechia's Energy Act has raised the threshold for mandatory electricity generation licences from 50 kW to 100 ...

The new rules support both large-scale batteries and standalone energy storage applications. Energy experts also organized a pre-launch webinar to guide participants through ...

Yet national plans for 2030 still set renewable targets well below the EU average, risking a slowdown in progress. To maintain momentum, CE countries need to match solar ...

Grants cover up to 30% of eligible solar installation costs and up to 50% for energy storage if applicants meet program requirements. Businesses must also submit a verification ...

Czechia has significantly reformed its Energy Act, doubling the mandatory licensing threshold for small-scale solar and simplifying rules for co-located battery storage.

The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported.

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...
