How many 5G base stations are there in China?

2027 master plan - a second 'Set Sail' 5G expansion plan aims for 85% 5G penetration and 75% of network traffic on 5G. The total number of 5G base stations in China reached 4.486 millionas of the end of May (2025),according to data released by the country's Ministry of Industry and Information Technology (MIIT).

How many 5G base stations will China Mobile have in 2025?

China Mobile,the world's largest mobile carrier in terms of subscribers,had previously outlined plans to deploy 340,000 additional 5G base stations in 2025. With these new 5G deployments,China Mobile's total 5G base stations will reach nearly 2.8 millionby the end of 2025.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

What are the challenges with 5G?

One of the biggest challenges with 5G is its energy consumption. A typical 5G base station consumes three times more power than a 4G station. This is due to the need for higher frequencies,greater bandwidth,and more antennas to ensure connectivity.

With 4.19 million 5G base stations already in operation, the industry regulator said that &quot;promoting 5G revolution and 6G innovation will be one of the priorities&quot; next year.

Yes, 5G base stations are designed to coexist and interoperate with existing 4G infrastructure, enabling a gradual transition from 4G to 5G networks. This allows operators to leverage their ...

5G technology is expanding faster than anyone could have predicted. More countries, companies, and telecom providers are racing to build 5G base stations, ensuring ...
