The EK Fluid Works 4U8G Barebone is ideal for AI development, large learning models, 3D rendering, scientific simulations, cybersecurity, photogrammetry, and more.

EK by LM TEK delivers high-performance liquid cooling for Gaming PCs and AI workstations. Shop CPU & GPU water blocks, radiators, pumps, and cooling kits.

The electric double-layer capacitor (EDLC) is made thinner with packaging technology where metal foil laminated film is used, and allowing maximum use of the space for ...

Premium high-performance acrylic CPU water block made for Intel LGA 1700 Alder Lake CPUs. EK-Quantum Velocity2 D-RGB provides low flow restriction and sophisticated D-RGB ...

Introducing Eaton's family of supercapacitors, unique, ultra-high capacitance devices utilizing electric double layer capacitor (EDLC) construction. Ideal for a wide variety of applications that ...

KEMET, a YAGEO group company, offers a wide portfolio of supercapacitors that store electric energy via an electric double layer at an interface between an electrolyte and a ...

Electric double layer capacitors are suitable for a wide range of applications, including memory backup in electronic devices, battery load leveling in mobile devices, energy harvesting, ...

EK AIOs are sealed units, pre-filled with liquid coolant to enable easy installation to your PC. The water block is mounted to the CPU to transfer its heat away.

EK®;, the premium liquid cooling gear manufacturer, is proud to introduce EK-Quantum Vector®;, our latest line of high-performance water blocks designed to provide the ...

Gain in-depth knowledge on Electric Double Layer Capacitors (EDLCs) and Supercapacitors as they apply to their working principles, applications, advantages, and differences compared to ...

EK Super Double Layer Capacitor
