Ultra-white rolled solar glass is a kind of glass manufactured through a special processing technology to improve the solar cell's absorption efficiency of sunlight. Its main features ...

Ultra-white calendered photovoltaic glass for solar ...

Pilkington Optiwhite(TM) is a range of ultra-clear float low iron glass, which maximises the solar energy transmittance and, therefore, the efficiency of the photovoltaic modules.

Pilkington Optiwhite(TM) is a low-iron extra clear float glass with very high light transmission. It is practically colourless, and the green cast inherent to other glasses is not present. It is ...

Pilkington Optiwhite(TM) is a low-iron extra clear float glass with very high light transmission. It is practically colourless, and the green cast inherent to ...

While super white glass excels in transmitting visible light, its ultraviolet transmittance is relatively low. This characteristic allows for efficient solar energy absorption ...

Solar Glass is a high performance low iron glass with very high solar energy transmittance. When toughened, its strength and durability make it the ideal choice for crystalline silicon ...

Pilkington Optiwhite(TM) is a range of ultra-clear float low iron glass, which maximises the solar energy transmittance and, therefore, the efficiency of ...

The solar glass made by our company has passed U1 Certificate by SPF Swiss International Testing Center and has become the first selected product of solar battery and solar water ...

Ultra-white calendered photovoltaic glass for solar photovoltaic modules is a kind of low-iron glass with ultra-white cloth (velvet) embossed surface, and the light transmittance can reach over ...
