By examining the progress made and challenges faced, the report aims to provide a comprehensive overview of the current state of residential rooftop solar PV adoption across ...

The EU's Solar Rooftop Standard, a part of the EPBD, aims to install 150-200 GW of solar rooftop, mandating solar readiness in new ...

In one of the most sweeping moves in climate policy history, the EU passed a solar rooftop mandate that reshapes how buildings interact with energy. Starting in 2026, all new public and ...

Explore the rise of rooftop solar in the EU, the challenges of grid congestion, and how net-billing policies shape the future of solar energy deployment.

The newly enacted EU Solar Rooftop Standard, part of the Energy Performance of Buildings Directive (EPBD), is set to dramatically expand rooftop solar capacity across Europe.

"Discover how the new EU Solar Rooftop Standard could add 150-200 GW of solar capacity by 2030, enhancing renewable energy across the EU."

The EU's new Rooftop Solar Standard is now official. Discover how this directive will unlock massive solar potential, reduce energy costs, and power millions of homes across ...

The European energy landscape is on the brink of transformation. By May 2026, the EU Solar Rooftop Standard--introduced under the Energy Performance of Buildings Directive--will ...

Explore the rise of rooftop solar in the EU, the challenges of grid congestion, and how net-billing policies shape the future of solar ...

Successful implementation of the EU Rooftop Solar Standard under the Energy Performance Buildings Directive (EPBD) could solar power the equivalent of 56 million ...
