Do you want to estimate the solar electricity production of your solar panels before investing in a photovoltaic system? PVGIS provides you with a detailed and precise simulation of your solar ...

Electricity generation from solar, measured in terawatt-hours.

This program aims to increase access to electricity and strengthen the Interconnected Network of Antananarivo. Specifically, 193 km of 90 kV electrical lines will be built.

As part of the new Malagasy government's 100-day program, solar energy will play an important role in electrification initiatives. Over the next few weeks, solar power generation ...

The French development NGO GRET has launched a solar electrification project in Madagascar, part of its ongoing commitment to reducing energy poverty and promoting ...

The French development NGO GRET has launched a solar electrification project in Madagascar, part of its ongoing commitment to ...

This program aims to increase access to electricity and strengthen the Interconnected Network of Antananarivo. Specifically, 193 ...

Antananarivo, Madagascar is a suitable location for solar PV generation. On average, each kW of installed solar generates 7.23 kWh/day in summer, 5.56 kWh/day in autumn, 5.03 kWh/day in ...

In January 2023, UNICEF Madagascar took a significant step towards sustainability by transitioning to solar power in our field offices. ...

To maximize your solar PV system's energy output in Antananarivo, Madagascar (Lat/Long -18.913, 47.5296) throughout the year, you should tilt your panels at an angle of 17° North for ...
