Explore Europe's 2024 solar boom, with gigawatt-scale projects in Germany, Spain, and beyond driving a historic shift in the continent's energy ...

Find the most up-to-date statistics about the solar photovoltaic industry in Europe

Explore how Europe's solar energy landscape is transforming with significant developments in solar capacity. Learn about the key players and countries leading the charge ...

OverviewPhotovoltaic solar powerEU solar energy strategyConcentrated solar powerSolar thermalOrganisationsSee alsoIn 2012, photovoltaic systems with a total capacity of 17.2 gigawatt (GW) were connected to the grid in Europe, less than in 2011, when 22.4 GW had been installed. In terms of total installed capacity, according to EPIA's 2012-report, Europe still led the way with more than 70 GW, or 69% of worldwide capacity, producing 85 TWh of electricity annually. This energy volume is sufficient to po...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

The highest solar potential is concentrated in the Iberian Peninsula, the lowlands of Romania, and parts of Central-Eastern Europe, all of which face economic challenges but ...

The highest solar potential is concentrated in the Iberian Peninsula, the lowlands of Romania, and parts of Central-Eastern ...

Solar power consists of photovoltaics (PV) and solar thermal energy in the European Union (EU). Solar power is growing in every EU country.

Under the European Green Deal and the REPowerEU plan, solar power is a building block of the EU's transition to cleaner energy. Its accelerated deployment contributes to reducing the EU's ...

Explore how Europe's solar energy landscape is transforming with significant developments in solar capacity.

Learn about the key ...
