What is a circuit breaker?

A Circuit Breaker is an electrical device made from materials such as metals, insulating materials, and other mechanical and electronic components for operation and tripping mechanisms.

What are the different types of circuit breakers?

They come in various types and sizes to accommodate different voltage levels and current ratings, ranging from small residential circuit breakers to large industrial circuit breakers. Circuit Breaker prices vary depending on the brand and electrical current capacity.

How do circuit breakers work?

Circuit breakers cut off electricity during overloads or short circuits to prevent damage. Electrical boxes enclose and protect these components, while fuses melt to break the circuit in case of overloads. These components ensure safety and reliability in residential, commercial, and industrial settings.
