Its 5MWh liquid-cooled container system offers UL9540A-certified safety, a plug-and-play design, and fast deployment for grid, industrial, and microgrid applications.

The FCP 160kW and 240kW mobile fast chargers are compliant and efficient recharging stations designed to quickly recharge the ZBC, so operations can continue uninterrupted.

As Vietnam's economy grows, the demand for energy is rising rapidly, putting significant pressure on the country's infrastructure. This surge in demand has exposed ...

This study analyses and anticipates the challenges that may arise in frequency stability in Vietnam's power system by 2030, when the renewable energy integration is ...

As Vietnam's economy grows, the demand for energy is rising rapidly, putting significant pressure on the country's infrastructure. This ...

While it is not Vietnam's first megawatt-scale stationary BESS project to date, the companies involved claimed it is the first such project to leverage third-party investment in ...

Vietnam began implementing BESS systems from 2019. However, due to the lack of a complete set of policies and regulations for BESS development, ...

At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power.

As Southeast Asia's fastest-growing economy (6.5% GDP growth in 2024), Vietnam is shifting gears from fossil fuels to clean energy faster than a VinFast VF 9 goes from ...

As Vietnam accelerates toward a sustainable transportation future, one critical challenge stands in the way: how do we build an electric vehicle (EV) charging infrastructure ...
