How do you fix a solar panel with broken glass?

The best way to fix a solar panel with broken glass is to replace it. Most solar panels are under warranty, and the standard warranty is generally for 25-years. If there is another issue with the solar panel, such as a bad microinverter, you would still replace the panel.

Should I repair or replace my skylight or Sun tube?

The nature of your problems largely determines whether or not it makes more sense to repair or replace your skylight or sun tube. Far and away, leakage is the most common issue with skylights and sun tubes. Over time, the features' various weatherproofing systems will inevitably begin to fail, allowing moisture and dust into your home.

Can a solar tube be repaired?

Repairing a solar tube is a complex project that is not suitable for DIY. It involves going into your attic or on top of your roof, and removing the skylight as well as its flashing, and disassembling it. If the tube is broken, it will need to be replaced, which if done improperly, could lead to water leaks from your roof.

Can a skylight be repaired?

You can repair the skylight by getting a new seal applied. The edges of skylight glass are dotted with a series of weep holes, which allow condensation on the glass to evaporate. Over time, these can become blocked with debris, leaving the condensation to drip into your home. When this happens, there is no choice but to replace the skylight.
