To have consistent power output from solar, say 10 MW, you need to generate enough to use 10MW for 11 hours of day while charging enough batteries to use 10MW for 13 ...

In this episode, I continue my look at Foundry. We research and build the Large Solar Panel, Large Battery, and Large Transformers while also working on run...

The Small Solar Panel is a power production building that needs to be connected to the High Voltage Grid. It will start at 100kW production at 8:00 and slowly ramp up Power linearly to ...

Recipe/Solar Panel (Small) Unlocked by researching Solar Panel ... Category: Recipe

To have consistent power output from solar, say 10 MW, you need to generate enough to use 10MW for 11 hours of day while charging enough batteries to use 10MW for 13 hours of night.

Has anyone sat down and done the math on what the average MW output is for the solar panels? It's seems kind of dumb to show me the instantaneous power output and not ...

You can't really take height into consideration because both types of solar require actual sun on the receiver - they do not work in the shade. So you can't just stack several ...

Units are not the same, so I wonder how many batteries would I need for each solar panel.
