Where is New York's first state-owned battery energy storage project located?

Governor Kathy Hochul today announced that New York's first state-owned utility-scale battery energy storage project is now operating in the North Country's Franklin County.

What is the northern New York energy storage project?

"The completion of the Northern New York Energy Storage project marks an important step to reaching New York's energy storage and climate goals." The project, located in Chateaugay, about 40 miles northwest of Plattsburgh, is the Power Authority's first utility-scale battery project and the first one built by New York State.

Where is a battery energy storage project located?

Governor Hochul announced the utility-scale battery energy storage project is now operating in the North Country's Franklin County.

Why is energy storage important in New York?

The energy storage system will supply the New York wholesale energy and ancillary service markets and will contribute to more economical and reliable electric power in New York. Due to the intermittent nature of wind generation, the excess energy needs to be captured when the wind is blowing so it can be dispersed when there is no generation.

Governor Kathy Hochul today announced that New York's first state-owned utility-scale battery energy storage project is now operating in the North Country's Franklin County.

Governor Kathy Hochul today announced that New York's first state-owned utility-scale battery energy storage project is now ...

The 175 MW / 350 MWh battery storage project will provide energy and capacity services to the New England grid, enhancing grid reliability and accelerating the integration of readily available ...

The power plant was commissioned in 2015 and started energy production the same year. The current owner and operator of the Freetown Solar facility is Mass Solar LLC.

In a pioneering effort for the Pacific region, Sunergise International subsidiary Clay Energy, in collaboration
