Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters" specs, warranties, prices and more.

For PV installations of all sizes, there are two main types of solar inverters used today: string inverters and microinverters. While ...

Solar inverters are key to making the electricity generated by solar panels usable in your home. Here are some of the best options on the market today.

It's a device that converts direct current (DC) electricity, which is what a solar panel generates, to alternating current (AC) electricity, which the electrical grid uses. In DC, electricity is ...
