Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Does Georgia Power have a battery energy storage system?

Georgia Power is already operating battery energy storage systems and has plans for more. The utility's 65-MW Mossy Branch BESS is located in Talbot County and began commercial operation in November 2024. Another 765 MW was authorized by the Georgia PSC and is projected to enter commercial operation in 2026, the utility said.

How many MW of energy storage does Georgia Power need?

Georgia Power is seeking 500 MW of energy storage with the ability to discharge for at least two hours, either standalone or with associated renewable resources, the utility said Tuesday. A draft request for proposals specifies the resources should be online in 2028 at the earliest and no later than the end of 2031.

Where is Georgia Power's first grid-connected BESS system located?

In February 2024, Georgia Power installed its first grid-connected BESS, the Mossy Branch Energy Facility, a 65 MW system on a couple of acres of rural countryside in Talbot County, north of Columbus, GA. It was approved as part of Georgia Power's 2019 IRP.
