Is Greece ready for a battery energy storage system in 2025?

In 2025, Greece has accelerated its plans for utility-scale Battery Energy Storage Systems (BESS), signalling a shift in policy, financing, and market expectations. However, while the scale of ambition is high, there are several tensions emerging--especially around the move toward unsponsored (merchant) projects.

What is Greece's new battery storage program?

Greece's new battery storage program has taken into account the areas most congested by the output of renewable power stations as well as the kind of renewable projects connected to the grid.

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.

Is Greece at a turning point with battery energy storage?

Greece in 2025 is at a turning point with Battery Energy Storage. The government's shift toward large unsponsored, merchant BESS with priority grid connection reflects confidence that market conditions -- especially curtailment pressures -- are making subsidised models less necessary. Yet that confidence comes with risk.

Greece has taken a decisive step forward in its energy transition with the launch of a 4.7 GW programme of standalone battery ...

The Greek government has opened for applications a programme that will subsidise businesses to install energy storage systems, either as part of new solar projects or ...

As the regulatory environment stabilises and the market grows in scale and complexity, Greece is on track to become a leading ...

The ministerial decision for Greece's 4.7 GW battery storage program is the last decision signed by Minister of Energy Thodoros Skylakakis and Deputy Minister Alexandra ...

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in

Greece. So far, ...

Despite these challenges, Greece's big battery push represents a pivotal moment in the country's energy evolution. The shift from rapid renewable expansion to a focus on ...

A new ministerial decree sets the framework for the installation of 3.55 GW of energy storage - standalone batteries, without subsidies. The new framework for batteries, ...

A new ministerial decree sets the framework for the installation of 3.55 GW of energy storage - standalone batteries, without ...

The ministerial decision for Greece's 4.7 GW battery storage program is the last decision signed by Minister of Energy Thodoros ...

Greece recently announced a plan to fast-track standalone storage projects, pushing toward its 2030 goal of 4.3GW of battery storage. At EuroEnergy, we recognize BESS ...
