Permitting procedures for solar development have been hindered by grid availability issues, with many areas facing rejections due to lack of electricity grid capacity.

Explore how Greece is decarbonizing its energy grid by combining solar with wind and hydro to meet demand for reliable and continuous power. Recent geospatial analysis ...

The plan prioritises the full interconnection of Greece's islands with the mainland, a critical step toward reducing reliance on polluting ...

Greece is the European Country with the most Sunny hours per year, therefore it is feasible for a residence to become fully autonomous ...

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs ...

Discover sustainable energy options for your property in Greece with solar panels and off-grid solutions. Learn about green energy benefits and implementation.

Greece is the European Country with the most Sunny hours per year, therefore it is feasible for a residence to become fully autonomous (concerning electrical power) by installing an off-grid ...

With energy prices in Greece among the highest in Europe, Greek citizens are grabbing new opportunities to generate their own ...

Cero Generation has announced that Delfini, its 100 MW solar PV project in Greece, has reached commercial operation. The project will generate 157 GWh of electricity ...

Delfini Solar -- Cero Generation's 100MW solar farm in Greece -- is now operational, generating 157GWh of electricity annually. Built on ...
