In cooperation with a leading Greek winemaker, this project has been focused on studying the cultivation of wine grapes within the protected environment of a glass greenhouse, aiming at ...

"By combining our novel coatings with silicon-based solar cells, we have optimized technology suitable for greenhouse applications ...

Brite Solar Glass Panel was finalized as a product in 2019 and has been used for a great number of pilot applications in greenhouses but also in open field cultivation ...

Build a passive solar greenhouse that heats itself by orienting glazing to true south, storing heat in water barrels and insulating the north wall so crops thrive even in ...

In contrast to traditional all-glass or all-plastic greenhouses, which often rely on fossil fuels to grow year-round, solar greenhouses can create warm year-round growing ...

This study calculates the intensity of radiation received by two types of greenhouses: Even Span and Modified Arched geometry.

Want to make use of solar energy to create a warm environment for plants or your pleasure? Here are the ideas for the ultimate solar greenhouse.

Brite Solar Glass Panel was finalized as a product in 2019 and has been used for a great number of pilot applications in greenhouses but ...

Innovation enables Thrace Greenhouses to produce the most natural hydroponic vegetables 365 days a year. Our greenhouses were designed and built based on the most technologically ...

Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative ...
