They say battery energy storage systems (BESS) could be a step in the right direction among the current solutions. These systems can ...

The Vietnam grid-connected battery storage market is witnessing a robust growth trajectory, primarily fueled by the nation's aggressive renewable energy integration targets and ...

They say battery energy storage systems (BESS) could be a step in the right direction among the current solutions. These systems can stabilise the grid by minimising ...

This initiative combines solar power with hydrogen technology to create a 50MW hybrid energy system, positioning Hanoi as Southeast Asia's first major city adopting grid-scale hydrogen ...

By leveraging innovative solutions and collaborations, the project contributes to diversifying the nation's energy portfolio while accelerating the transition by improving grid ...

While it is not Vietnam's first megawatt-scale stationary BESS project to date, the companies involved claimed it is the first such project to leverage third-party investment in ...

"Today's workshop has demonstrated the tremendous potential of energy storage systems in supporting a just energy transition, while also outlining concrete steps to turn ...

Explore cutting-edge energy storage solutions in grid-connected systems. Learn how advanced battery technologies and energy management systems are transforming renewable energy ...

SunContainer Innovations - Discover how Vietnam's groundbreaking energy storage project is reshaping renewable energy adoption and grid stability in Southeast Asia.

Last April, their Hanoi-made BESS (Battery Energy Storage System for the acronym lovers) banked enough daylight to power 6,000 homes during a 3-hour grid crash.
