How much does a 4 kW solar panel cost?

A 4 kW solar panel system costs \$11,200 in 2025 before incentives. A 4 kW solar panel system produces about 5,808 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 4 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company.

How much does a solar inverter cost?

Most solar panel contractors charge around \$50 to \$100 per hour. You may save \$1,000 to \$2,500 up-front by choosing a string inverter over a microinverter or hybrid inverter. A solar inverter costs \$2,000 on average, with prices often ranging from \$1,000 to \$3,000. That said, some homeowners spend as little as \$800 or as much as \$5,000.

How much does a 4 kW solar panel cost in 2025?

In 2025, a 4 kW solar panel system costs around \$11,200 before incentives, based on real installation data from across the country. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are available in your area.

What is a 4kW Solar System?

A 4kW Solar System is a complete PV solar power system that includes solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans, and instructions. These grid-connected solar kits are suitable for homes or businesses and provide everything needed to set up the system quickly.

Expect to spend \$0.15 to \$0.24 per watt on a solar inverter, not including labor costs. The size of your system, the type of inverter, and the efficiency rating affect your final cost.
