In this project we will see how to configure and run a 5G end-to-end setup using SDRs and Openairinterface5G, an Open Source software. For this reason, we will need to configure: OAI ...

Explore how 5G base stations are built--from site planning and cabinet installation to power systems and cooling solutions. Learn the ...

Installation of Base Stations: Deploy gNodeBs at selected sites. This involves physical installation, power supply setup, and connection to the backhaul network.

This topic presents the communication flow between the 5G base station (gNB) and user equipment (UE) nodes, explaining the uplink (UL) and ...

Here is a detailed technical explanation of the 5G network installation process: Site Selection: Identify suitable locations for 5G base stations or small cells. These could be ...

First, you have to prepare USRP B200/B210 to run srsRAN. However, please keep in mind that you would still need a fairly high-end PC (at least dual-core i5, better quad-core i7) ...

In this project we will see how to configure and run a 5G end-to-end setup using SDRs and Openairinterface5G, an Open Source software. For this ...

What is 5G Baseband Unit (BBU)? The 5G baseband unit connects with Radio Unit and processes the protocol stack and forwards traffic to the 5GC. Depending on requirements, ...

This topic presents the communication flow between the 5G base station (gNB) and user equipment (UE) nodes, explaining the uplink (UL) and downlink (DL) transmission.

Insert the SIM card into the modem and connect the modem to the USB Type-A port on the base station. You can plug the modem directly into the port on the base station, but for ...
