Where can I find information about energy storage regulations in New York City?

Updates and resources can be found on the Working Group's webpage. You can download NYSERDA's New York City [PDF]factsheet to learn more about energy storage regulations in New York City. The Trainings for Local Governments page offers additional resources including recordings and materials from NYSERDA's battery energy storage system trainings.

What is the battery energy storage system guidebook?

A public benefit corporation, NYSERDA has been advancing energy solutions and working to protect the environment since 1975. The Battery Energy Storage System Guidebook contains information, tools, and step-by-step instructions to support local governments managing battery energy storage system development in their communities.

What are the requirements for energy storage system commissioning?

(energy code progress inspections) ACP5 or ACP7 - Asbestos Abatement Form (if there is risk of asbestos contamination) Architectural Drawings and a permit work must be filed by registered design professional, expeditor, contractor, registered local inspection agency, etc. System Commissioning is a requirement for every energy storage

What is a battery energy storage inspection checklist?

The Inspection Checklist is intended to be utilized as a guideline for field inspections of residential and small commercial battery energy storage systems. It can be used directly by local code enforcement officers or provided to a third-party inspection agency, where applicable.

The Guidebook provides local officials with in-depth details about the permitting and inspection process to ensure efficiency, transparency, and safety in their communities.
