How do I open the battery compartment?

1) Open the battery compartment by pushing outwards with both thumbs on the compartment cover. Try not to press downwards as you push outwards, and you can try wearing rubber or nitrile gloves for improved grip. 2) If that doesn't work, nudge the battery cover open with a dime at the base of the battery cover as shown below.

How do you open a AA battery compartment?

If there is not a tab or notch, the battery compartment may be held together with small clips or magnets. In this case, use a small flathead screwdriver to pry the battery compartment open. Assuming you are talking about a AA battery compartment, the lid can usually be pried open with a fingernail or a small flathead screwdriver.

How do you open a car battery?

There is usually a small tab or notch that can be pried open with a fingernail or a small flathead screwdriver. If there is not a tab or notch, the battery compartment may be held together with small clips or magnets. In this case, use a small flathead screwdriver to pry the battery compartment open.

Can you open a battery compartment without a screwdriver?

It is not possible to open a battery compartment without a screwdriver. What can I use if I don't have a tiny screwdriver? If you're in a pinch and need to cut something, a butter knife or small cheese knife will do the trick. Just take the blade and angle the handle down toward the ground to give yourself some leverage.
