Discover how Dominica is leveraging wind, solar, and battery storage systems to achieve energy independence while addressing climate resilience. This guide explores active projects, data ...

The call, by the Unified Council of Distribution Companies (CUED), will be the first in the nation to require projects to include batteries with storage capacity of at least four hours. ...

Join Smart Energy, Huawei Digital Power, and DOMLEC as we unpack the technical journey, lessons learned, and practical insights from this landmark project.

The call, by the Unified Council of Distribution Companies (CUED), will be the first in the nation to require projects to include ...

Huawei Digital Power has announced the signing of a key contract with SEPCOIII for its NEOM Red Sea project, which involves 400 MW of PV plus a 1300 MWh battery energy storage ...

Power plants that feature a synergy of wind, solar, hydro, thermal power, storage, and hydrogen are attracting increasing attention. Technological ...

The Dominican Republic has launched its first tender for up to 600 MW of solar and wind capacity with mandatory storage, requiring all projects to include battery systems ...

The Dominican Republic has launched its first tender for up to 600 MW of solar and wind capacity with mandatory storage, requiring all ...

This is a valuable opportunity for utilities, regulators, engineers, and energy practitioners across the Caribbean to learn how battery storage is transforming island grids.

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications in rural electrifications, particularly solar ...
