How is Huawei addressing climate and environmental challenges?

Huawei is proactively working to address climate and environmental challenges. We use innovative ICT solutions to protect our shared home by focusing on three areas: advancing energy conservation and emissions reduction, promoting renewable energy, and contributing to a circular economy.

What is Huawei's environmental policy?

This policy statement describes Huawei's general principles and requirements for environmental management based on Huawei's policies and regulations, such as those pertaining to Huawei's sustainability policy, green operations, green products, green supply chain, green packaging, and product design for recycling.

Where is Huawei's solar power station located?

In the Kubuqi Desert of Inner Mongolia, the State Power Investment Corporation used Huawei's smart PV solution to build a 300 MW solar power station. The power station located in Dalad Banner, an administrative region in Inner Mongolia, boasts 196,000 solar panels that were installed in the pattern of a galloping horse.

What is Huawei doing to protect the environment?

Huawei is working closely with global environmental protection organizations, customers, and partners on projects that explore the use of ICT to protect forests, wetlands, and oceans, and increase the efficiency of biodiversity and natural resource protection and management.

The seamless integration of Huawei's energy storage power station equipment with renewable energy sources is a crucial factor in its growing popularity. As the world shifts ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

This policy statement describes Huawei's general principles and requirements for environmental management based on Huawei's policies and regulations, such as those pertaining to ...

By reducing energy waste and extending the lifespan of solar equipment, EMS makes solar projects more reliable and eco-friendly. In ...
