Explore how flow and sodium-ion batteries are revolutionizing energy solutions for islands, enhancing sustainability and reliability.

One of the country's largest battery energy storage sites is about to be built on Staten Island. It's part of New York's push for renewable energy.

Already interconnected to the grid, the unit is capable of storing 7.5 MW / 30 MWh of energy -- the equivalent of powering approximately 3,000 homes for four hours.

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.
