What is Juba solar power station?

The Juba Solar Power Station is a proposed 20 MW (27,000 hp) solar power plant in South Sudan. The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an energy consultancy firm also based in the UAE.

Why is Juba launching a 20MW solar project?

The project contributes not only to the country's environmental targets but also to improving energy accessibility and affordability for local communities. The 20MW solar facility is capable of supplying power to approximately 16,000 households in Juba, offering a significant reduction in energy prices and enhancing grid stability.

Where does Juba get its electricity?

Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the county was estimated at over 300 MW and growing. Nearly all electricity sources in the country are fossil-fuel based, with attendant challenges of cost and environmental pollution.

Does jedco need a solar plant?

The solar plant now supplies 19% of JEDCO's total energy distribution, complementing the existing thermal power plants. However, to ensure sustained reliability and long-term growth, additional renewable sources like the government-operated Nisitu Solar Plant will be essential in supporting thermal energy output.

Sungate Solar offers reliable and sustainable solar solutions in South Sudan. Our innovative products and services provide access to clean energy, powering homes, businesses, and ...

The Juba Solar Power Station is a proposed 20 MW (27,000 hp) solar power plant in South Sudan. The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an energy consultancy firm also based in the UAE. The solar farm will have an attached battery energy storage system rated at 35MWh. The off-taker is the South Sudanese Ministry of Electricity, Da...
