Kenya is currently the largest producer of geothermal energy in Africa. It is one of two countries in Africa that produce geothermal energy, the other being Ethiopia. In 2010, geothermal energy accounted for almost 20 percent of Kenya's total electricity generation. The country has the potential to produce 10,000 megawatts of geothermal-powered electricity, according to Kenya's sta...

With the right mix of policy, innovation, and investment, it can become a continental leader in energy storage too. BESS can not only stabilise the grid but also ...

Thermal storage can convert heat to electricity & thus has a hallowed place in industrial setups that produce process heat. However, retrofitting such into existing thermal ...

The BESS project has been identified as a possible solution to increased proportion of intermittent energy to the Kenyan power system and energy curtailment during ...

Power Shift Africa and the University of Technology Sydney (UTS) developed a comprehensive energy pathway for Kenya that is aligned with the Paris Climate Agreement goals. The ...

Kenya is an emerging economy endowed with renewable energy resources due to its geographical location. This review aims to identify policies guiding the extraction, utilization, ...

As part of the East African Power Pool (EAPP), Kenya aims to strengthen regional energy trade, ensuring a reliable and interconnected energy market across borders.

Kenya exported a record 10.76 GWh in March 2025, but also saw imports rise to 120.76 GWh--highlighting its dual role in regional power trade.

Kenya's electricity grid shares interconnections with Ethiopia, Tanzania and Uganda, and additional interconnectors with other East African countries can further support the exchange ...

In this exclusive behind-the-scenes look, we explore the entire journey of Del Monte's supply chain -- from
