We combine double glass construction with back contact cells and can even customize the size, shape, and electrical configuration. ...

Tailored and Turnkey PV Module Production Solutions.

Production line specification: 1. 200MW module production line (1). 2. Beat: ≤ 45 seconds/block. 3. The type of panel produced is a conventional full-cell/half-c...

We help you design and source a customized production line for producing BIPV glasses in various sizes, colors and geometries for Solar Façades and Agrivoltaic applications.

What is glass-glass module technology? In this paper a glass-glass module technology that uses liquid silicone encapsulation is described. The combination of the glass-glass structure and ...

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar ...

For photovoltaic systems requiring efficient energy production and stable long-term operation, double glass modules are undoubtedly the best choice. Double glass modules generally offer ...

Raytech's double glass solar modules are compatible with various customized installation methods based on customer needs. If needed, we can also pre-fabricate installation parts with ...

To improve production efficiency, our Solar/PV modules production line is equipped with intelligent MES and defects detection systems: EL-VI, Hi-Pot, IV, Calibration, and other ...

Glass-glass module structures (Glass Glass or Double Glass) is a technology that uses a glass layer on the back of the modules instead of the traditional polymer backsheets.
