French renewable energy producer Qair has secured a loan agreement to finance the construction of 60 MW of hybrid solar and storage projects in Mauritius.

With integrated battery storage, the facilities are expected to deliver a consistent energy output for at least 12 hours a day, mitigating the intermittency challenges associated ...

Independent renewable energy company Qair announces the closing of a new loan to support the implementation of a hybrid solar photovoltaic and battery energy storage system ...

Paris, August 7, 2025 - Independent renewable energy company Qair announces the closing of a new loan to support the implementation of a hybrid solar photovoltaic and battery energy ...

The project is scheduled for completion by the end of 2024 and represents a critical step in Mauritius's ambitious plan to source 60% of its energy from renewables by 2030.

According to Qair, the projects were awarded in 2023 as part of four hybrid solar plus BESS developments totaling 60 MW AC, marking one of the country's largest energy ...

In an exciting development for renewable energy in Africa, Qair, an Independent Power Producer (IPP), has successfully closed a loan to finance a significant 60MW hybrid ...

The objective is to gradually replace coal with local renewable sources and achieve a planned, irreversible transition to a cleaner energy mix by 2035, supported by national ...

With integrated battery storage, the facilities are expected to deliver a consistent energy output for at least 12 hours a day, mitigating ...

French independent renewable energy company Qair has successfully closed financing for a groundbreaking hybrid solar ...
