The Long Island Power Authority Board of Trustees on Dec. 18 approved two battery energy storage contracts in Suffolk County: a 79-megawatt facility in Hauppauge and a ...

The LIPA board of trustees has approved two battery storage projects proposed by developer Key Capture Energy. The 79 MW project in Hauppauge and the 50 MW facility in ...

OverviewConstructionSafetyOperating characteristicsMarket development and deploymentA battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a group of batteries in the grid to store electrical energy. Battery storage is the fastest responding dispatchable source of power on electric grids, and it is used to stabilise those grids, as battery storage can transition fr...

Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in New York City in service just in time to help ...

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the ...

Once completed, the project will be the largest battery storage installation in New York City. The facility will be able to power more than 10,000 households during peak demand ...

NineDot Energy, a leading developer of community-scale clean energy projects backed by global investment firm Carlyle, today unveiled its first battery energy storage site in the Bronx, ...

Since battery storage plants require no deliveries of fuel, are compact compared to generating stations and have no chimneys or large cooling systems, they can be rapidly installed and ...

New York City's largest battery storage facility will replace a natural gas peaker plant unit retiring in 2025.
