Amid an electricity crisis, many Nigerian small businesses run on petrol generators. This solar-microgrid start-up is working to connect them to clean energy.

Local communities generating their own power could become 90% energy self-sufficient, with potential to be fully self-reliant in the future, according to a Dutch study.

A PV Microgrid Site Power Unit is a modular off-grid or hybrid-grid solution that combines solar panels, battery storage, and intelligent control systems to provide reliable, autonomous power ...

Dutch cyclists rode down the world's first bike path made entirely of discarded plastic this week, in a move aimed at reducing the millions of tonnes wasted every year.

This paper explores the integration of PV power generation and ESS into the DC microgrid to supply the required energy to a 5G base station. The loads in the 5G base station ...

Microgrids can step in when the main electricity grid fails. And as they can be powered by renewables, they are a sustainable and affordable option, too.

NLR developed a PV-battery-diesel hybrid power system for the U.S. Army Rapid Equipping Force and the Expeditionary Energy and Sustainment Systems to provide power to ...

See how edge AI puts intelligence where it's needed most - at the edges of our power networks, working locally on or near the grid's sensors and devices.

After seven years of development, the microgrid at Marine Corps Air Station (MCAS) Miramar near San Diego has achieved yet ...

Pakistan's unstable electricity supply has driven a boom in private adoption of solar power - but it could further destabilize the national grid.
